

## **I. DESCRIPTION OF THE PLANNING UNIT**

This chapter describes the geographic area of the plan and how the planning council members reached agreement on the composition of the management areas within the planning unit.

### **A. Description & Determination of the Planning Unit**

In this section is a discussion of the Area Development District and its service boundary (which comprises the planning unit for the water management plan).

The Planning Unit consists of Breathitt, Knott, Lee, Leslie, Letcher, Owsley, Perry, and Wolfe Counties. These eight counties make up the Kentucky River Area Development District. In August of 1991, water suppliers and local officials from the eight counties voted unanimously to participate in joint planning. Upon passage of Senate Bill 409, the commitment to regional planning was reaffirmed.

### **B. Water Management Areas**

The discussion below relates how the council formed its water management areas and how it arrived at its decisions and provides a map showing the water management area boundaries.
